

Replibit

<http://www.efolder.net/products/replibit/>

Built specifically for small and mid-market solution providers

eFolder Replibit is a patented, end-to-end business continuity software platform, empowering MSPs to deliver profitable backup and disaster recovery solutions. eFolder is channel-only, they do not work with companies that are not IT solution providers.

- **Chain-free incremental backup solution**
- **Automated test boots with screenshot verification**
- **Central multi-tenant management** - Monitor and manage all your customer installations through a single online management console
- **Multiple hosting options** - eFolder can host each piece, but the Replibit infrastructure can also be entirely self-hosted
- **Multiple appliance options** - Run in a VM, build your own, or purchase
- **Multiple vaulting options** - eFolder hosted or roll your own
- **Multiple offsite storage pricing options** - 3 vs 10 year unlimited cloud retention, or per-agent pricing
- **Multiple recovery options** - Download individual files and folders from an appliance or vault, export a volume as a virtual disk (VMDK/VDI/VHD/VHDX/RAW), mount a particular backup as an iSCSI target, or run the protected system directly off the appliance.
- **ConnectWise Integration** - ticketing and billing
