

Unitrends MSP

Be a hero to your customers. Reduce downtime with instant recovery and automated disaster recovery testing. Unitrends MSP brings together enterprise-class backup, ransomware detection, and cloud-based business continuity disaster recovery (BCDR) services in a powerful, all-in-one appliance-based platform that provides top-quality services with high margins and minimal maintenance.

UnitrendsMSP can backup natively over 100 different operating systems. This can be physical or virtual assets. Integration with VM hosts from VMware, Hyper-V XenServer or Nutanix.

We provide file-level backups of CIFS, NFS or NDMP on a NAS. Native application level backups for SQL, Exchange, Oracle, and SharePoint, as well as agent-based file/folder.

Backup copies in our cloud can be spun-up in the event of a disaster. The cloud offering includes 30 days of virtualization per calendar year. Backup copy targets can also be a physical hard drive, a NAS, a LUN on a SAN, iSCSI, Fiber channel, tape, or cloud from AWS, Rackspace or Google

UnitrendsMSP offers recovery assurance beyond taking a screenshot of the backup's lock screen. Recovery Assurance is automated testing and orchestration for your VMware, Hyper-V and Physical Windows machines. It provides **Certified Recovery Fail Over Points** from automated scripts all while tracking RPO and RTO objectives.

- **Support is all based in Columbia South Carolina 24/7/365**
- **No upfront hardware cost on 3+ year agreement**
- **One year or Infinite Cloud Retention, or host your own backup copies**
